

JAA Spill Response Chart

Revised May 2022

START - Is the spill more than 5 gallons or a threat to public safety?

Is the spill more than 25 gallons or a serious threat to public safety?

Serious Hazardous Material Overflow - The responsible party shall follow all guidelines outlined in the minor and major hazardous material overflow AND within 5 business days provide JAA a written spill summary which identifies measures to eliminate future potential for spills. The incident must also be reported to the EQD, SWP, and FDEP. Contact JAA.

Minor Hazardous Material Overflow

The responsible party shall immediately stop the source of the spill, contain spilled material, and block nearby storm drains. The incident should then be reported to the Fire Department and JAA. Create a written record of the spill details.

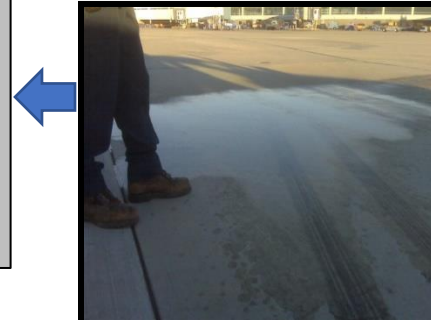

The incident must also immediately be reported to the EQD.

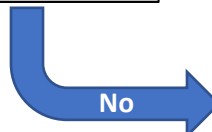

The incident must also immediately be reported to the EQD and FDEP.

Is the spill petroleum / petroleum products AND more than 10 gallons?

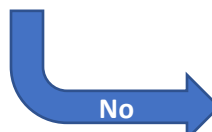

Major Hazardous Material Overflow

The responsible party shall follow all guidelines outlined in the minor hazardous material flow section AND secure the safety of the immediate public, assess environmental impacts with JAA, and within 5 business days provide JAA a written summary of the spill. Notify NRC and LEPC as necessary. Contact JAA.

Did the spill enter the environment?
